Work Experience

Sparsh Innovators Private Limited

Jamshedpur, Jharkhand

ANDROID DEVELOPER

Feb 2019 – Jan 2022

- Designing XML layouts: Creating visually appealing and user-friendly layouts using XML in accordance with design guidelines and specifications.
- Writing Java code: Developing the entire codebase for the Android application, including activities, fragments, services, and other components, using Java programming language.
- Implementing MVVM architecture: Transitioning the codebase from a traditional architecture to the Model-View-ViewModel (MVVM) architecture, which improved code organization and separation of concerns

Aruvaa Technologies Private Limited

Jamshedpur, Jharkhand

ANDROID DEVELOPER

Jan 2022 – Present

- Collaborated in the development of a SaaS product using Laravel and implemented the tenancy concept.
- Enabled users to create their own products and modules within the platform.
- Integrated the drag and drop functionality of DevExtreme to allow users to design their own UI easily
- Developing an Android app for the SaaS product, providing a server-driven UI experience.

Projects

Sparsh CRM

Java, XML

Sparsh CRM is an Android project I contributed to, aimed at streamlining sales and customer management processes. It offers lead, attendance and contact management, task and calendar organization, sales funnel analysis, communication integration, data analytics, and a user-friendly interface

Shri - Github

Kotlin, Co-routine, Room, MVVM

Shri is a user-friendly Android app designed for efficient expense management. It helps users track expenses. Shri empowers users to take control of their finances and make informed financial decisions

Mausmi - Github

Kotlin, Co-routine, Retrofit, Clean Architecture

Mausmi is a convenient Android application that provides real-time weather information based on the user's current location. With its intuitive interface and reliable data sources, Mausmi offers users instant access to accurate weather updates.

Suno - Github

Kotlin, Co-routine, Media Player, Room

Suno is a sleek and user-friendly Android app that lets you enjoy your favorite podcasts with ease. Stream, create playlists, and explore a wide range of podcast genres. With intuitive controls and a seamless user experience, PodcastPlayer is the perfect companion for podcast enthusiasts on the go.

Education

Institute of Professional Studies

Gwalior

BE (DROP-OUT) IN COMPUTER SCIENCE

Aug 2016 – June 2018
